

# D-01 Displacement sensor

## **Basic characteristic**

- D-01 is a 0-80mm range spring loaded linear displacement sensor.
- Displacement range is adjustable at installation, for example:
  -40/+40mm, -30/+50mm or similar within the 80mm range.
- D-01 sensor is supplied with integrated temperature used for compensating temperature changes during measurement.
- D-01 has ruggedized housing applicable in harsh environments.

### **Benefits**

- Direct mountable.
- One-body design for both displacement and temperature measurement.
- Customizable measuring ranges and cable lengths.

## **Applications**

- Dilatations
- Settlement measurement
- Crack monitoring
- Borehole extensometer
