

May 2016

Dear Sir or Madam,

Please accept this document as a formal notification that SYLEX will be gradually replacing existing MTP green and yellow connector housings with housings with different colour shades. This change is based on the decision of our connector supplier (US Conec), which harmonizes all colour shades across all US Conec product lines. The materials used are completely RoHS compliant and will not require reliance on exemptions for environmental regulatory compliance.

Below you will find basic pictures with components in old and new colour shades.

This change will be implemented through a gradual roll-out, coming into effect after stock of the current MTP connector housings are depleted.

Sincerely,

Your SYLEX team
