

Drum + cable limitation

Dear suppliers,

we would like to inform you about the maximum dimensions and weight of the drums loaded with cables that we are currently able to process on our standard production line.

You can find the overview of the dimensions in the table below. For better understanding we also attach the drawing.

Because of the above mentioned reason we would like to ask you not to exceed these maximum dimensions within all your future deliveries to Sylex.

In case you are not able to meet our requirements already before starting your production contact the person responsible for the purchasing order from Sylex.

Dimensions	
Max. drum weight with cable	1000 kg
Max. drum height	1000 mm
Max. drum flange diameter	1600 mm
Max. drum flange hole diameter	110 mm

Drum + cable limitation
